PM

Honorable Jennings Randolph
Chairman, Committee on Public Works
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman:

In accordance with the provisions of the Public Buildings Act of 1959, as amended, there is submitted for consideration by the Committee a prospectus which proposes the acquisition of space, under a lease arrangement, in a facility to be constructed for use as a Federal Executive Institute and Managerial Training Center, Civil Service Commission, at Charlottesville, Virginia.

The submission of this prospectus has been approved by the Office of Management and Budget in accordance with the provisions of Executive Order 9384, dated October 4, 1943.

Sincerely,

Arthur F. Sampson
Administrator

PROSPECTUS NUMBER: PVA-75011

PROSPECTUS FOR PROPOSED LEASE
UNDER THE PUBLIC BUILDINGS ACT OF 1959, AS AMENDED

FEDERAL EXECUTIVE INSTITUTE AND
MANAGERIAL TRAINING CENTER (FEI-MTC)

CHARLOTTESVILLE, VIRGINIA

1. DESCRIPTION OF PROPOSED PROJECT:

This prospectus proposes the acquisition by lease of approximately 196,000 net occupiable square feet of special purpose space in a complex of buildings to be constructed to General Services Administration's (GSA's) specifications and requirements on a site of approximately 25 acres on the grounds of the University of Virginia, Charlottesville. The complex, to be operated by the Civil Service Commission (CSC), will replace the smaller (40,115 sq.ft.) and functionally inadequate space used by the Federal Executive Institute (FEI) and leased at the Thomas Jefferson Inn, Charlottesville, Virginia, and will consist primarily of living/sleeping areas, training and seminar rooms, faculty and administrative offices, and common use facilities such as auditorium, library, multi-purpose recreation, kitchen/dining, maintenance, and utility and storage. The complex will also include surface parking for 250 vehicles. (See Chart #1)

The University of Virginia will lease the facility to the Government for a firm term of 20 years at a total estimated annual cost of \$2,410,000, including the cost of services, utilities and outside maintenance, which will be negotiated annually based on actual costs incurred. The University will offer three 10 year renewal options at \$687,500 per year plus the cost of services, utilities and outside maintenance, which will be negotiated annually based on actual costs incurred.

The University of Virginia will provide financing for this project through the sale of bonds, will handle construction and will act as lessor. Construction of this project is conditioned upon approval of this prospectus and upon the authorization by the Virginia Legislature of a bond issue. It is anticipated that this sole source procurement will permit construction to begin in 1976. Occupancy is planned for 1978, at which time the existing lease for the Thomas Jefferson Inn will be cancelled.

The proposed facility will:

- ...almost double, from 40,115 square feet to approximately 79,450 square feet, the space of the FEI while more than doubling, from 68 participants to 140 participants, its capacity.
- ...provide approximately 49,455 square feet for a new Managerial Training Center with a capacity of 85 participants.

PROSPECTUS NUMBER: PVA-75011

- . . . provide approximately 66,480 square feet of joint use space consisting of an auditorium, a learning resource center, a multi-purpose recreational area, a health unit, a maintenance shop, and so on, none of which is available at the present leased facility.

2. COMPREHENSIVE PLAN:

a. PROJECT NEED:

The primary justification for this project is based on a current deficiency in available training space and an increase in demand for training space associated with the projected increases of both supergrade executives and mid-level managers and their training and development needs. The new facility will have a capacity of 225 participants, 140 in the FEI program and 85 in the MTC program.

Supergrade (GS-16 to 18) executives currently number 7,000 and are projected to increase at an annual rate of 1.5 percent in the last quarter of this century. In Fiscal Year 1973, with attrition and the increase in positions, there were 719 new supergrade executives. By Fiscal Year 1980 the new supergrade executives can be expected to number 860, 1,000 by 1990 and 1,225 by Fiscal Year 2000. The present FEI facility has a maximum capacity of 68 participants in each training session. There are a variety of training programs lasting from 2 1/2 days to seven weeks. The two major training programs are three weeks and seven weeks long and over a year can fully train only 544 participants. If the present capacity is not expanded, a deficiency of 56 percent in the training of new executives will result by Fiscal Year 2000. This does not include the backlog of supergrade executives who have never attended the FEI, expected to be 3,000 by Fiscal Year 1980. The new complex will have the capacity to train 140 participants in each training session. The two major executive training programs will be able to accommodate 1,120 participants annually. (See Chart #2) The continued increase in executives entering GS-16-18 positions necessitates a corresponding increase in the training capabilities of the FEI if the charge of Executive Order 11348, the Presidential authorization for this type of training is to be carried out. On signing this Executive Order (April 20, 1967), the President directed the Chairman of the Civil Service Commission to establish a center for advanced study for upper echelon career executives.

In addition to the new supergrade manager population, however, there are other categories which are expected to contribute substantially to the FEI student potential, including the backlog of supergrade managers who have never attended the FEI, state and local Government managers, FEI

alumni for whom "booster shot" training is desirable, and the increasing number of managers among women and minority groups.

A new MTC (GS-14-15 and high potential GS-13) is needed to fulfill two requirements. First, present provisions for interagency residential managerial training are insufficient. Managers currently number about 58,000 at Grades GS-13 through GS-15 and are projected to increase at an annual rate of 1.5 percent in the last quarter of this century. In Fiscal Year 1973, with attrition and the increase in positions, there were approximately 3,250 new managers and about 2,750 advancing managers. In Fiscal Year 1980, the new managers can be expected to number 3,590, 4,200 in 1990, and 4,850 in Fiscal Year 2000.

The present interagency residential facilities can accommodate less than 2,100 managers annually. Thus, the current capacity does not meet even half the needs generated by the present turnover, let alone have the capacity for the interagency residential training needs of incumbent managers. The proposed facility will have a capacity of 85 participants in each training session, and with approximately 17 training sessions per year 1,445 managers can be accommodated. Although the proposed facility in concert with the existing MTC's, will aid in meeting the demands for training, even more of a training capacity is necessary and will be sought before the proposed facility is ready. (See Chart #2).

Second, there is a need for a mid-level MTC near Washington, DC. The nearest interagency residential MTC is in Kings Point, New York, a distance of about 250 miles, yet almost 35 percent or about 21,000 of the mid-level managers are located in the Washington, DC area.

The collocation of the new mid-level MTC and the expanded FEI is proposed for the following reasons:

- 1) The program flexibility available in a facility of this size
- 2) The saving available through sharing of administrative services, physical facilities and some sharing of faculty and part-time professional resources
- 3) The operational economics of providing services (heat, electricity and so on) to one complex of buildings rather than two separate sites.

The location of the project is proposed on the grounds of the University of Virginia for the following reasons: First, the facility will be adjacent to a high-quality, prestigious, professional school campus composed of the Graduate School of Business, the Law School, and the Judge Advocate General's School, all of which complement Federal

PROSPECTUS NUMBER: PVA-75011

programs to be conducted at the facility. Second, other library and faculty resources are readily available to enrich training programs at the facility, with complete access to research and general libraries of the University, and with well-established interchange arrangements for faculty utilization. Third, support services of the University are available to participants in training programs, including complete services of the School of Medicine and guidance of physical therapy and health experts. Fourth, cultural activities of the University are open to participants, including lectures, theater, music, and visual arts. Finally, the University is willing and able to finance and construct the facility and to lease it to the Government without profit, land costs, or property taxes in the annual rental rate.

b. DISCUSSION OF ALTERNATIVES:

1) Utilization of existing Government-owned buildings

Existing Government-owned buildings are the Federal Office Building (FOB); the Department of the Army Reserve Training Center Facility; and the Post Office and Courthouse Building. The requirements for the training facility are based in part on the type of educational atmosphere the Civil Service Commission wants to create. These unique requirements coupled with the size of the facility preclude consideration of modification and expansion of any of the existing Government-owned buildings.

2) Acquisition of existing leased space

Existing rental space is not available in sufficient quantity in one location to permit expansion and collocation and fails to meet the unique requirements of the training facility.

3) Expansion of the existing leased facility

The Thomas Jefferson Inn constructed in 1952 is on a limited site of 8.3 acres, which could accommodate the proposed increase in square footage and facilities. However, the density of the complex would be the antithesis of the type of development the Civil Service Commission believes is necessary for the education program of the FEI-MTC. Any proposed addition would also require extensive modification to the existing structure in order to incorporate new technology and systems. The property is located in an area zoned B-1 (Business) an inappropriate location for the low scale land intensive educational type of complex required. For these reasons, expansion of the existing leased facility is not considered feasible.

4) Acquisition of space in a Government-owned building to be constructed

Because of the unique nature of the training facility, the advantages of the lease agreement with the University of Virginia, the advantages of the lease agreement with the

PROSPECTUS NUMBER: PVA-75011

University, and the proposed location of the facility on the grounds of the University, direct Federal construction is not the best alternative.

- 5) Acquisition of leased space in a building to be constructed by a private developer

Since the University will not include any taxes, profit, or land cost in the annual rental rate and since financing will be significantly less for a bond issue than for conventional financing, leasing of a building to be constructed by a private developer is not the best alternative.

- 6) Acquisition of leased space in a building to be constructed by the University of Virginia

A present value analysis comparing direct Federal construction and leasing of a building to be constructed by a private developer with leasing of a building to be constructed by the University of Virginia has been prepared (Exhibit B). The analysis indicates that acquisition of leased space in a building to be constructed by the University of Virginia is significantly less costly than either direct Federal construction or acquisition of leased space in a building to be constructed by a private developer.

3. <u>ESTIMATED MAXIMUM COST:</u>	<u>Sq. Ft.</u>	<u>Annual Cost</u>
Estimated net annual rental.....	196,000	\$1,856,000
Estimated value of lessors services.....		554,000
Estimated value of services and utilities paid by the Government.....		0
Estimated total annual cost.....		<u>\$2,410,000</u>

4. CURRENT HOUSING COST:

For agencies to be housed in the proposed leased space.

	<u>Sq. Ft.</u>	<u>Annual Cost</u>
Net Annual Rental.....	40,115	\$ 118,715
Value of Lessors Services		\$ 164,285
Value of Services and Utilities paid by the Government		\$ 17,925
Total Annual Cost		<u>\$300,925</u>

PROSPECTUS NUMBER: PVA-75011

5. SPACE PLAN:

The relocation of the FEI to leased space on the grounds of the University of Virginia will permit the expansion of the FEI and collocation of a new mid-level MTC. The lease for the Thomas Jefferson Inn will be cancelled. Since the space being requested is of such a special nature, no other Federal agencies will be affected by this proposal. The plan for housing Federal activities in Charlottesville, (Exhibit A) and the current leasing situation (Exhibit B) are attached.

6. STATEMENT OF NEED:

It has been determined that (a) the need for space cannot be met by utilization of existing property owned by the Government, (b) suitable rental space is not available that meets the unique requirements of this training facility, and (c) it is unfeasible to modify and expand the existing facility.

PROSPECTUS NUMBER: PVA-75011

IV. PLANNING COORDINATION

As required by the Intergovernmental Cooperation Act of 1968 (P.L. 90-577) and Executive Order 11512, the development of this project will be coordinated with the Federal, State and local agencies. There are no local or regional plans for the site since it is on the grounds of the University of Virginia and the University does its own planning. The project is compatible with the University's Master Plan of March 1973, which designates this site for future academic and related insititutes and open space. With the increase in employment and students, there will be a minor positive impact on the local community's development and economy. The relocation and expansion of the FEI and the collocation of the mid-level Training Center will facilitate the training of Federal executives, thereby increasing the capabilities of mid and senior level management in the Federal Government. The relocation would also free a parcel of land currently under-utilized as a low density educational facility for use in accordance with its business zoning.

V. PARKING

The zoning regulations for the City of Charlottesville for University type buildings require one off-street parking space for each 8 seats in the main auditorium or three parking spaces for each classroom, whichever is greater. This would equate to approximately 84 spaces.

The University of Virginia, for the Duke-Copeley Hill area which is adjacent to the proposed site of the FEI-MIC, provides parking for 60 percent of the students, 80 percent of the staff, and one visitor space for each 30 faculty/staff. This would equate to approximately 210 spaces;; however, because of the number of participants coming from the Washington, DC area, about 250 spaces will be provided.

The 250 parking spaces planned for the project would be utilized as follows:

Government-owned and visiting faculty	10
Visitors and service vehicles	8
Staff	64
Students	168
	<u>250</u>

EXHIBIT B (cont'd)

PROSPECTUS NUMBER: PVA-75011

VI. HOUSING

In accordance with Executive Order 11512 and the DHUD/GSA Memorandum of Understanding, this project has been reviewed for possible application of the aforementioned documents. It has been determined, since the total complement of low and moderate income employees for the project is less than 100 persons, that pursuant to Federal Property Management Regulations 1702.4 as amended (101-17.104.3(d)(2)) the procedures relative to the availability of low and moderate income housing on a non-discriminate basis are not applicable.

VII. ENVIRONMENTAL DATA

In the development of this project, studies will be made of the water supply, sewage disposal, solid waste disposal, storm water drainage, erosion control, fuel types, transportation network, and so on, in order to comply with the purposes and intent of Executive Order 11514, "Protection and Enhancement of Environmental Quality" and will comply with the requirements of Section 102(2)(c) of the National Environmental Policy Act of 1969 (P.L. 91-190), as amended, and the guidelines promulgated by the Council on Environmental Quality.

VIII. CONSIDERATION UNDER THE RURAL DEVELOPMENT ACT OF 1972 (P.L. 92-419)

As required under this Act, first priority consideration has been given for the location of this facility in rural areas as defined in the private business enterprise exception in Section 306(a) (7) of the Consolidated Farmers Home Administration Act of 1961, as amended (7 USC 1926). The grounds of the University of Virginia are located in Albermarle County and not within the boundaries of the City of Charlottesville. Thus, this facility will be located in a rural area according to the definition cited above.
